

HOTONE SKYLINE Series
Stompbox

WOOD

Acoustic Guitar Simulator
Owner's Manual

THANK YOU FOR PURCHASING A HOTONE PRODUCT!

WOOD is an acoustic guitar simulator stompbox designed for guitarists. It provides a large adjustable range which is enough to turn an ordinary electric guitar tone into a variety of natural, realistic acoustic tones.

Use the 3-way toggle switch to choose from 3 different simulation modes; the BODY knob and the TOP knob can further shape your tone.

Controls the sense of attack and the harmonic content of the upper range

Plug in 9V DC adapter (center negative)

Controls the output level

Controls the body resonance simulated sound

J: Simulates the tone characteristics of a jumbo guitar
D: Simulates the tone characteristics of a dreadnaught guitar
P: Simulates the sound produced by a piezo pickup
